## C-FRDY Zenith 750 STOL

Born in 2013, C-FRDY "Freddie" quickly became a media darling while being showcased in the U.S. during the 2014 -15 airshow seasons. Its distinctive stylized goose on a sun yellow base with blue checkerboard easily stands out in a crowd. A veteran of Oshkosh and Sun and Fun, Freddie's quality construction and attention to detail has been admired by thousands of attendees. A collaborative effort between Rotech Rotax Engines and Skytek professional aircraft services, this Rotax 912iS Zenith 750 has many optimized performance kits added. Freddie has been meticulously maintained and its showroom condition reflects the special attention it has received. Current time on airframe and engine is 460 hours, subject to increase as it is flown on a regular basis.

An upcoming project requires Freddie to find a good, new home. We are currently entertaining offers for this outstanding Zenith 750 STOL listed at \$123,000 CDN. There are several excellent YouTube videos that showcase Freddie and the aircraft's capabilities. Please only serious enquiries for "Freddie".
